

## Graduate IT Analyst in Poznan with European travel

### Profile

BAE Systems Detica is a large successful global software business headquartered out of Guildford in the UK with major offices in Europe, North America, Australia and Asia. The software is used to solve fraud in banks, insurers and Government departments as well as preventing money laundering and helping police forces with intelligence solutions. It also performs most of its own consultancy and system integration services.

### What you will be doing...

This role offers a unique opportunity to gain experience in industry leading fraud prevention with our flagship social network and link analysis product NetReveal.

### The key responsibilities of an IT Analyst are to:

- Work within an international team of analysts using our clients' software to derive intelligence from high volume customer data.
- Deploy enterprise solutions within international blue chip clients.
- Apply and develop leading edge analytical methods, such as data mining and social network analysis.
- Adhere to and enhance software development approaches and methodologies
- Deliver high quality work to meet client expectations and project deadlines.
- Respond to and resolve technical issues.
- Go beyond routine questioning to find the underlying causes of problems or discrepancies to identify problems and develop sound solutions.
- Maintain performance when under stress and manage time effectively through the application of organisational and planning skills.

### Position Requirements

- BSc or equivalent in Computer Science, Information Technology, Physics, Mathematics, Statistics or another numerate discipline (grade 4 or above)
- Coding or scripting experience is expected, Java is a strong advantage.
- Experience with databases, data analysis or data querying tools is highly desirable; SQL, SAS or R are especially relevant.
- Experience in technical projects involving large amounts of data (ETL, data mining, and the like) is a strong advantage.
- Knowledge of software development project tools, principles and techniques.
- Previous related experience, especially in Financial Services, would be a strong advantage.
- Excellent communication skills and experience of team working.
- Fluent Polish and English in speaking and writing are essential; another European language would be a strong advantage.
- Excellent analytical and problem solving skills.
- Ability to work autonomously.

### The role offers...

- A very competitive base salary and an attractive benefits package.
- Excellent training (potentially in the UK) and career development.
- Support network for all new joiners.
- Involvement in exciting international client projects.

### How to apply

Please email your current CV **in English** to [Detica.Recruitment@qtisolutions.co.uk](mailto:Detica.Recruitment@qtisolutions.co.uk) by 25 October 2012. If you are successful at the first stage, you will be contacted by one of our recruiters for an initial screening call in English. Your written English might be tested as well.

If you are offered the role, you will be expected to start in November or December 2012. Please note that *initially you might need to undertake 6 week training in the UK.*
