Doctoral degree programmes – Mathematics

The Faculty of Mathematics, Computer Science and Econometrics at the University of Zielona Góra (WMIiE UZ) offers doctoral degree programmes in theoretical mathematics and in applications of mathematics.
The Faculty offers doctoral degree programmes in the following branches of mathematics:

- functional equations

- mathematical statistics

- approximation theory

- dynamic systems

- game theory

- mathematical economics

- graph theory

The doctoral degree programmes are accessible for graduates who hold the professional title of Master (*magister*) or an equivalent degree.
Admission decision will be based on candidates' previous study results and achievements, presented opinions, and on their aptitude evaluated during an interview.
